

# Piqnic

Design by Peter van de Water

## Bring a touch of the outdoors into your workday

That relaxed, easy-going feeling of being outdoors, sharing a table and enjoying the moment, is exactly what we aimed to bring inside. With this in mind, designer Peter van de Water created the Piqnic series.

Designed especially for offices and communal spaces, Piqnic invites people to

connect, collaborate, share lunch, or simply relax with a cup of coffee. The series has grown into a family of high and low tables, benches, and stools. All sharing the same clean and distinctive design language.

**Piqnic. Let's bring people together.**

# Disque

Design by Peter van de Water

## Designed to move you

Playful, stylish, inviting, that's Disque, the latest furniture system from Cascando. Created especially for offices, lounges and collaborative spaces, Disque offers a versatile range of high and low furniture elements for informal meetings, short working moments, or simply taking a break to relax.

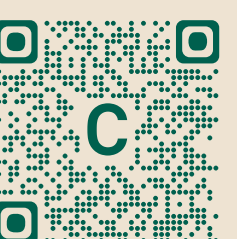

The clear geometry of circles and ovals brings a sense of unity, and turns every composition into an inviting whole. Benches, bar stools, and poufs encourage active and varied seating, while tables in different heights invite flexible and social ways of working.

**Disque. Work, meet, and relax in style.**
