

Pillow Space screen support

Pillow Space is a series of acoustic space dividers with an unprecedented performance and is also available with screensupport. With integrated LCD screens, you can give your presentation wherever you want.

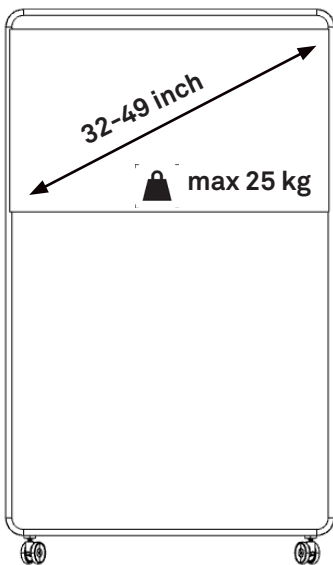

The acoustic material even absorbs sounds and improves acoustics. This makes the screen support perfect for meetings or presentations. You can also combine the option with integrated LCD holder with various other functionalities that Pillow Space offers

Mounting tv

Cable management

The cabinet has a cable hole in the middle of the upholstered panel. The TV cables can be routed through this opening so that they are not visible from the front. The cables run down the center of the cabinet and can be connected to a floor socket or an extension cord, for example.
