

Pillow Wall

Privacy & acoustic furniture

Acoustic specifications

Design Robert Bronwasser

Think of a Pillow as a beacon. Walls can be changed into a dynamic information centre. Magazines, brochures, maps or private possessions each have their own place on the wall. Every wall is a meeting point.

A wide range of fabrics, colours, dimensions and functions enables the design of a personal wall for any lobby, hallway, office or meeting room. The panels can be placed adjacent to each other or with some space in between. Pillow Wall panels create spatial intimacy, conveying a homecoming.

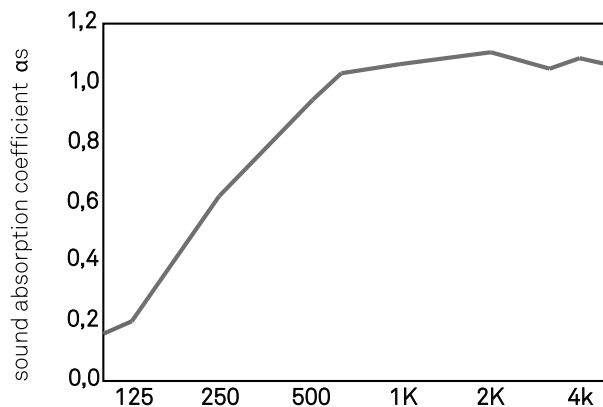

Available in acoustic **class A** (premium panel) and acoustic **class C** (standard panel)
