* Estimated percentage of recyclability at end of life. Recyclability depends on consumer use and re-use. Advice to separate materials as much as possible. Consider re-upholstering for upholstered products.

General

PACKAGING

When packaging products, as little as possible plastic packaging materials are used. Where possible, plastic is replaced by more sustainable options, such as crumpled paper instead of bubble wrap or suchlike. Products will only be packed with minimal plastic, if the quality cannot be preserved without plastic packaging. More than 95% of the product components come from suppliers located within a radius of 200 kilometers around our production facility.
