

Pully Lounge

Design by Robert Bronwasser

Cascando
complementing workspaces

Pully Lounge

One family, a new application.

Pully Lounge is a new addition to the Pully family. It introduces lounge seating to the series, while retaining the familiar, approachable character.

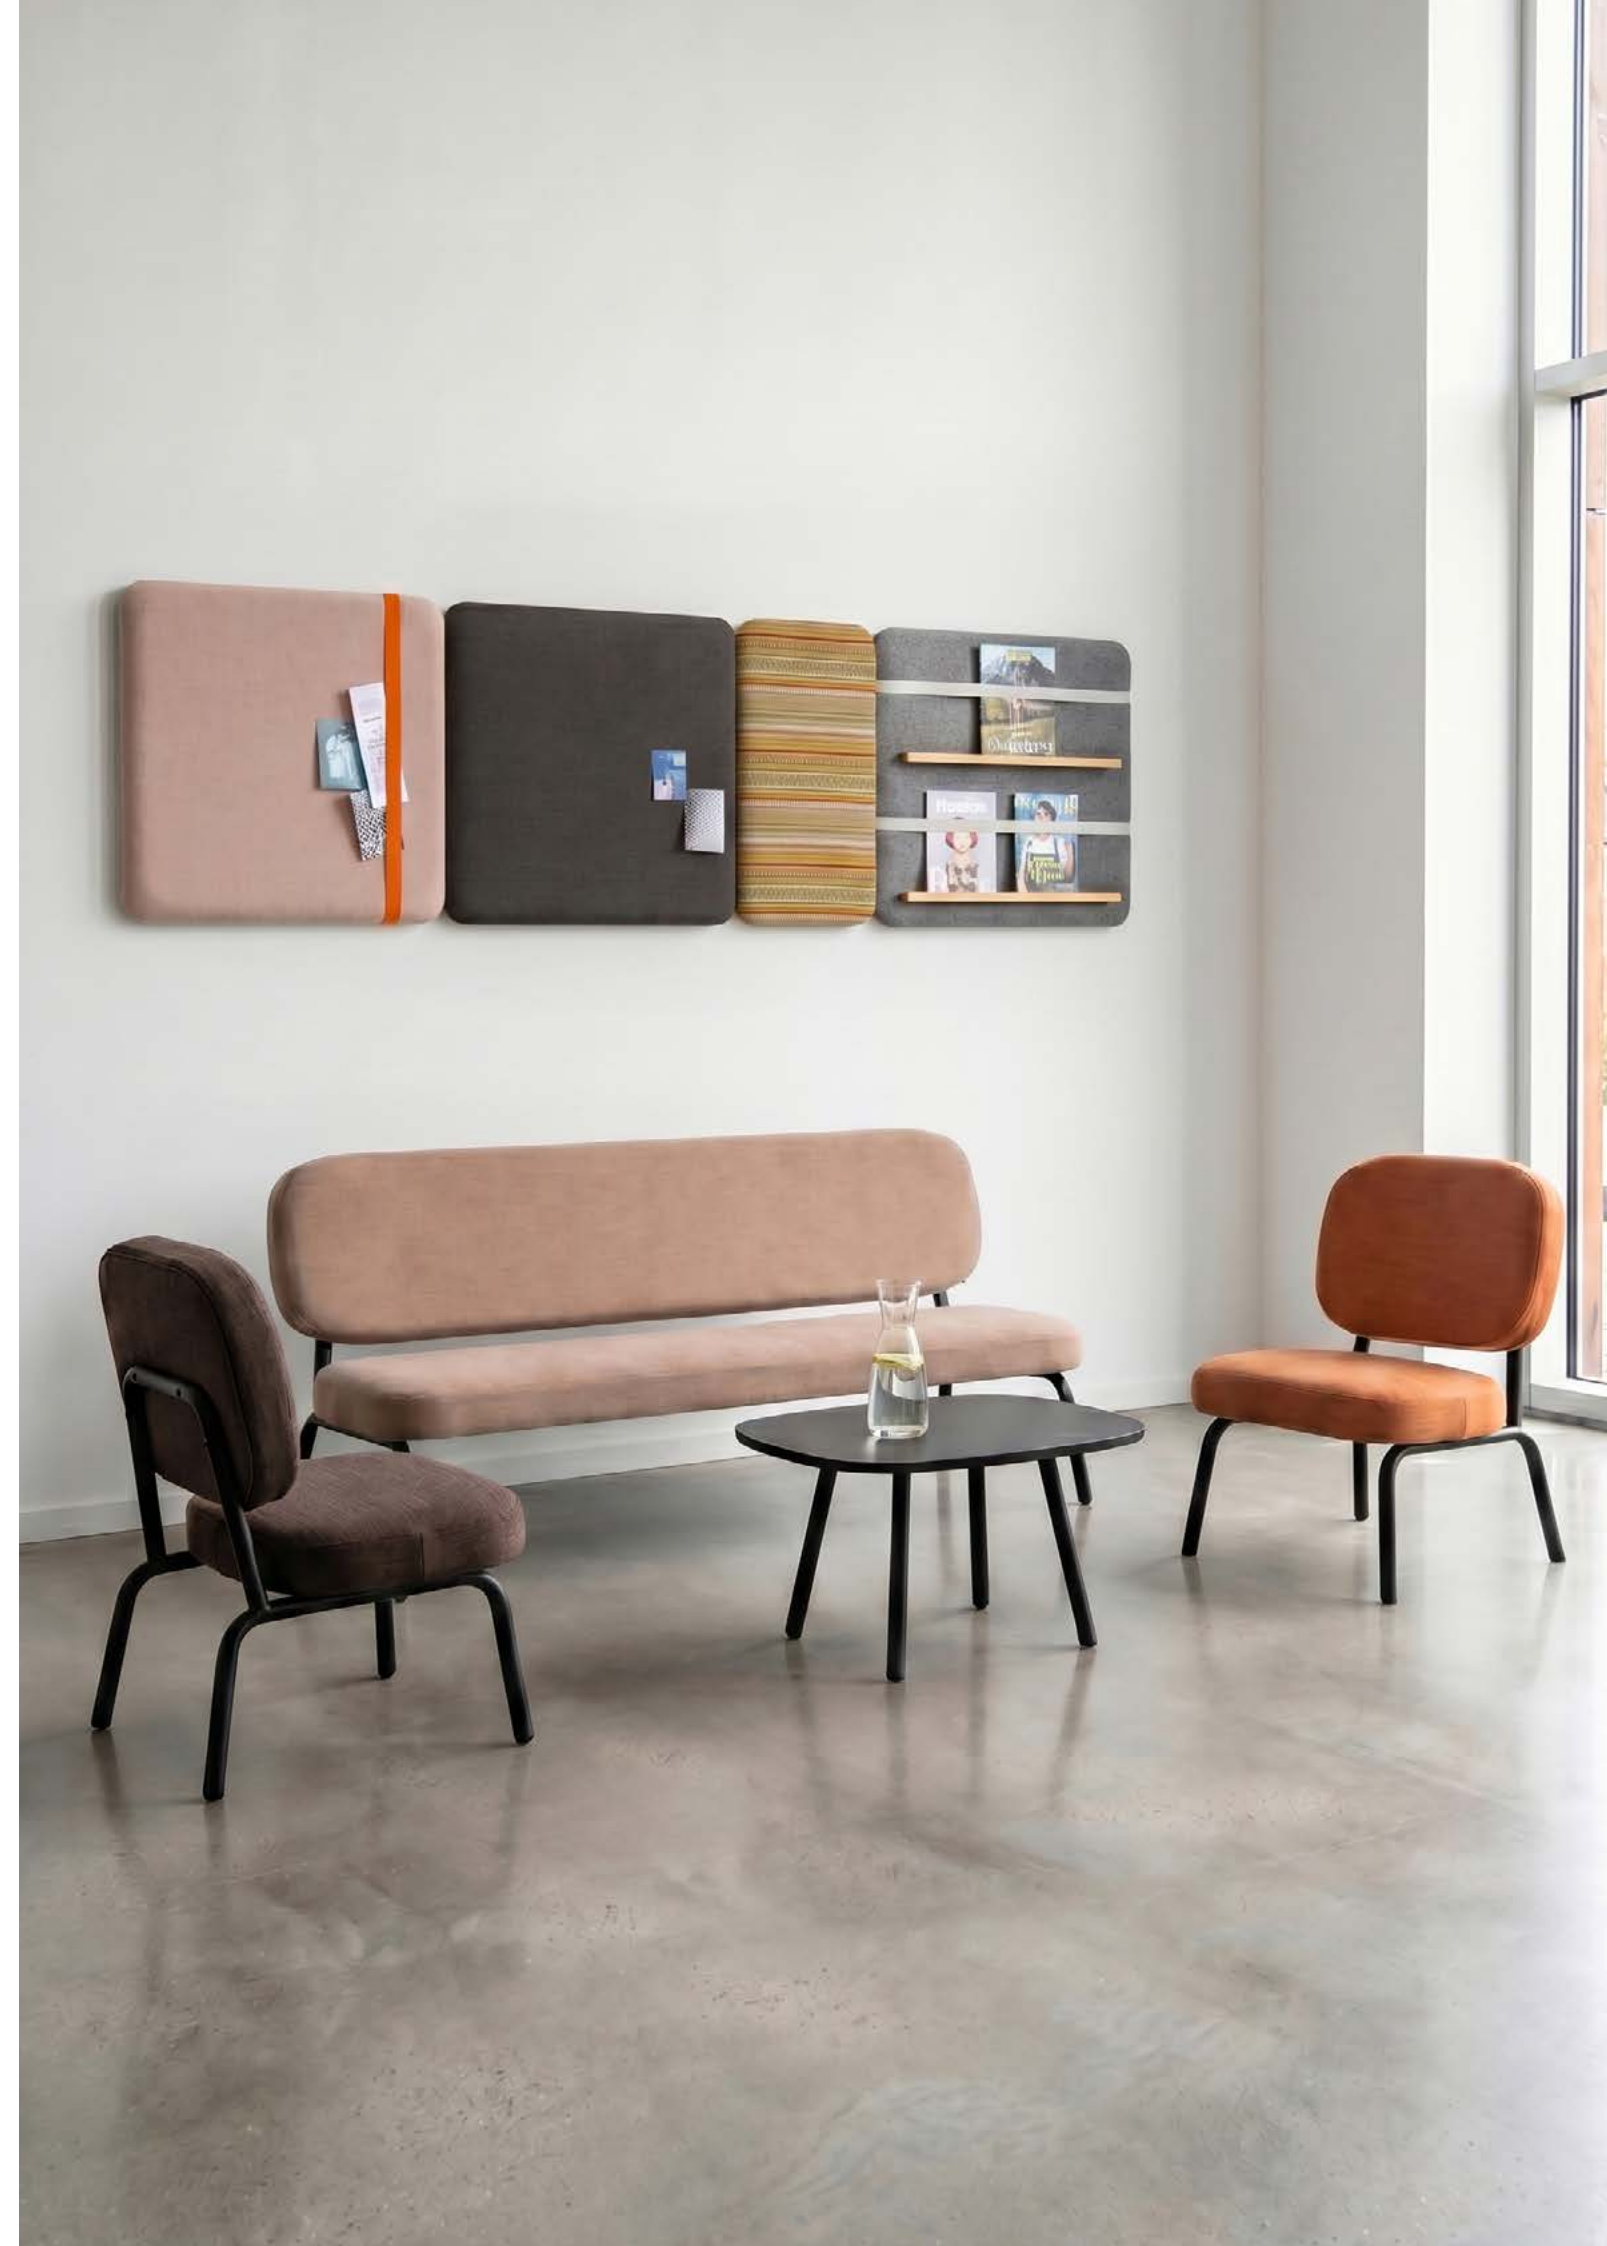

Designed for places where people come together, wait or meet. Pully Lounge fits seamlessly into the rhythm of the day.

The right size for every space

One, two or three seats, each with a backrest that offers support and comfort. The proportions are precisely tailored to lounges, waiting areas and informal meeting spots.

One line, recognisable everywhere

Pully Lounge combines effortlessly with the rest of the Pully series, creating coherence across different zones within a single interior. For the interior architect, that means a consistent design language. For the user, a great place to sit without stepping out of the moment.
